

# Summer School Quantum Technologies UAS Technikum Wien

Quantum technologies are growing into a key technology of the 21st century. Already now in no other field the demand on the job market so dramatically exceeds the available workforce.

In this summer school we will approach the topic in a relaxed and playful setting. No prior knowledge of quantum physics is required.

**Die Summer School ist kostenlos und findet vom 16.–19. August an der FH Technikum Wien statt.**

*The participation is free of charge and will allow to obtain a certificate (2 ECTS). The summer school will take place from August 16th to 19th at UAS Technikum Wien.*

**Complemented by lectures of international experts we will work on projects on:**

- Quantum Key Distribution
- Quantum Computing
- Enabling Technologies such as Lasers, Cryo- and Vakuumsystems
- Applications of quantum technologies such as in robotics.

Due to high demand, registration will be closed effective immediately and new registrations will go on a waiting list.

[Waiting list](#)

**Applications until July 1st**
