The goal of the summer school is to teach participants how to mitigate climate change by implementing bioeconomy, sustainable use of bioresources and creating innovations and to spread the knowledge in their countries.

Participants of the summer school will gain knowledge, contacts for further cooperation, practical experience and self-confidence in the field of bioeconomy. Summer school topics will be connected with introduction of research methodology in bioeconomy: data collection, processing and analysis of results by using different computer models (multi-criteria analysis, different models of regression analysis, geographical information systems and system dynamics modelling).

The proposed topics of the program:

- Climate Change Analysis and Possible Mitigation Mechanism Determination
- Sustainable Use of Biological Resources
- Creation of Innovative Products
- Usage of Environmental Technologies in Practice
- Research Methodology in Bioeconomy: Data Collection, Processing and Analysis
- Eco-Design Development
Riga Technical University offers accommodation if booked in advance. The Student Hostel is located in the RTU Kipsala Campus. Within walking distance there is a big shopping mall with grocery store, cafeterias, pharmacy, sport and free time accessories shop and the city centre is reachable on foot.

Accommodation Options
